## WE HEAR

Mrs. Pete Larson is a patient in a Calgary hospital.

Mrs. Fred Harsch is spending a few days at Hanna visiting at the home of her daughter and son-in-law.

Beverley Geick had a birthday party in the Legion Hall on Saturday and received many lovely gifts.

Miss Evonne Foster of Yorkton General Hospital is spending three weeks holiday at the home of her parents.

Mrs. Frank Smith and daughter, Shiela of Calgary were weekend visitors at the home of Mr. and Mrs. S.J. Cannings.

Drumheller Juveniles are the Alberta "B" Champions having defeated Morinville Jimmy Foster scoring the winning goal on Friday. Very good, Jimmy.

Mr. and Mrs. Foster, Howard Hunt, Mr. and Mrs. Sam Garrett, Mr. and Mrs. Jack Barr, Evonne Foster and Mr. Al Baynes all took in the hockey game at Drumheller Thursday evening. We understand it was a very exciting and grand game.

Mrs. M. Switzer and Patsy are visiting in Calgary this week.

The Home and School Tea and Home Cooking that was held on Saturday was a grand success.

Three rinks entered the Lions Bonsiel being held March 26 at the Glenioe Clob in Calgary.

A Wedding Dance was held Friday evening, March 21st in the Scout Hall in honor of Mr. and Mrs. S.T. Cannings, whose marriage took place recently. C. Cave was M.C. for the evening. At midnight the guests of honor were presented with a purse, and after all their friends gathered in a ring and sang, "For They Are Jolly Good Fellows," a delightful lunch was served, and dancing was resumed until the early hours of the morning. Everyone enjoyed a grand time.

Miss Christa Sell, who formerly worked at the Holy Cross hospital in Calgary, is visiting her mother a few days before she leaves on March 27 for Rest Haven, Sidney, B.C.

## BIRTHS

To Mr. and Mrs. Steve Homenick, a daughter on March 23rd.

To Mr. and Mrs. Bud Anderson, a daughter on March 19 in Three Hills Hospital.

## Level Land

Miss Anita Lang and Earl Lang of Calgary were visiting friends in the Level Land district over the weekend.

Mr. and Mrs. Willard Huether of Drumheller were weekend visitors at the home of parents, Mr. and Mrs. Albert Huether.

Pastor and Mrs. A. Blair of Calgary were at the S.D.A. church on Sat. night, March 22. Mrs. Blair assisted in the class work.

Misses Freda Borgardt of Calgary and Emily Borgardt of Beiseker were visitors at the home of Mr. and Mrs. John Leiske on March 2.

30XXX30

If you are interested in selling your oil rights, 1% or 100% for cash, please write J. Vandenburg, 10549—110th Street, Edmonton, giving full particulars.

## In Memoriam

SAUNDERS

In loving memory of Les who passed away March 31, 1951.

I cannot say, and I will not say That he is dead—he is just away.

With a cheery smile and a wave of the hand,

He has wandered into an unknown land

And left us dreaming how very fair

It needs must be since he lingers there.

So think of him faring on, as dear

In the love of there as the love here;

Think of him still as the same, I say:

He is not dead—he is just away!

Ever remembered and loved by his wife and family, Mrs. Doris Saunders, Murray and Marie.

FOR SALE—Small Farm at Carbon. 20 acres. Good Buildings. —Royal Hay, phone R403.

FOR SALE—Victory Seed Oats. Free of Wild Oats. Germination test 92%. Registered Hereford Bull.

—A.D. Penner phone 511, Acme

FOR SALE—No. 1 Couch Free Brome Seed. 19c a lb., bags included. 5 pct. discount on 1000 lb. lots. Prices on other grass seeds on request. Sold at Linden Machine Works. Phone 2120, Acme. Linden, Alta.

Get a new strap for your watch.

We have all sizes at \$1.00

## FARMERS' EXCHANGE

### The Birth of a New Department in Our Store

To our many customers & friends in Carbon & District—Thanks to your very much appreciated patronage throughout our store we have grown out of our Dry Goods Department. Therefore, in order to accommodate our increased business and to make your shopping profitable and pleasant we have put in a complete new and modern Dry Goods Department. In order to celebrate the opening of our new department we are passing on **Some Real Savings in Dry Goods**. Please watch for our **Large Sale Flyer** that you should receive in the near future. If you don't get one, please ask for it. Our policy as in the past will be **City Assortments, Service and Prices**.

L. POXON

## THERE'S MONEY FOR FERTILIZER

at the B of M

The purchase of fertilizer is sometimes a headache. Because the need for it usually comes at a time when there are a lot of expenses and little income.

Avoid that headache this year. See your B of M manager about a loan. Repayment terms are easy—suited to a farmer's requirements. Drop in at your nearest B of M branch today, or as soon as convenient.

**PRIZE HERDS SLAUGHTERED TO CHECK DREADED DISEASE**—Prize herds of cattle, among them the pets of many a farm boy, have been slaughtered in the Regina area as the federal government moved to wipe out all traces of the dreaded hoof-and-mouth disease. Most of the cattle slaughtered showed no visible trace of the disease leaving cattlemen bewildered on the necessity of killing them. The U.S. government may ease its hastily declared embargo on Canadian livestock if the spread of the disease appears to be completely arrested.

### Dreaded Virus

## Foot-and-Mouth Disease Feared By World's Cattlemen

**Spreads Like Wildfire and Can Be Disastrous to the Whole National Economy**

OTTAWA.—Foot-and-mouth disease is feared by cattlemen throughout the world. It is as damaging to livestock as smallpox and the bubonic plague is to humans. It spreads like wildfire. The only way to halt it is to slaughter infected animals and bury the carcasses.

Transmitted by a tissue-destroying virus, the scourge in recent years has struck at Mexico's thriving cattle industry and almost destroyed it. It has crippled livestock production in continental Europe. It has threatened to injure Britain's economic comeback.

Just where this animal plague originated is unknown. Some scientists believe it has a 2,000-year European history traced back to biblical days. But actual documentation goes back only about 400 years.

Foot-and-mouth disease in European agriculture has become so widespread that some countries have given up trying to eradicate it. Young animals infected by it sometimes die. Older ones become so lame and useless that they become uneconomic to maintain.

But it doesn't affect the human. Humans have been known to eat infected meat, properly cooked. The cooking apparently kills the bacterial infection.

The virus, transmitted in many ways by animals, by humans on their boots and clothes, and even by flocks of migrating birds and hay and straw, hits exposed animal tissue.

It causes blisters on the mouth, tongue, udder and some parts of the animal hoof. It sometimes even gets into the stomach and ulcerates tissue there. The animal goes off its feed. It becomes lame. It loses weight.

Worst of all, the virus spreads quickly. Herds and counties can be infected within days.

When it broke out in Mexico in 1946—the first time since 1929—hundreds of thousands of cattle were slaughtered and farmers compensated for their loss. By boat, aircraft, truck and automobile, agricultural technicians moved in on the infected areas, cleansing and sterilizing barns and equipment.

The fight against foot-and-mouth disease in Mexico still goes on.

The United States had its last outbreak in 1929. It was controlled. But so fearful are cattlemen of the possibility of a recurrence, that an emergency train stands ready in Chicago to be moved with vaccines and other emergency equipment to contaminated areas at a moment's notice.

In Britain, the fight against foot-and-mouth has been continuing for years. The threat there is from Europe. Huge flocks of migrating birds, moving from Europe to Britain, sometimes carry the virus.

But the virus has invaded many other countries. Last year a federal survey showed that only Canada, the United States, New Zealand, Australia, Ireland and Scotland were free from the disease.

Dr. Thomas Childs, chief veterinarian for Canada, considers the disease comparable in deadly toll to an epidemic of bubonic plague.

"Hitting hard and fast," he says, "an outbreak of this disease could be

disastrous to the whole national economy."

Foot-and-mouth disease is characterized by the formation of vesicles or blisters on the mucous membranes covering the tongue, lips, cheeks, palate, or other tissues of the mouth, on the skin between and above the claws of the feet and on the teats and udder.

In hogs, lesions frequently occur also on and above the snout. In rare cases, the muzzles of cattle are affected. In sheep, goats and deer, the feet are the most common site of the blister formation.

The disease is usually accompanied by a fever. The fever and difficulty to eat cause a rapid loss in flesh and a rapid slowing down of milk secretion. The udders often become inflamed and ruined by the formation of abscesses and sometimes cows become permanently crippled for milk production.

The inflammation of the feet may cause the horn to drop from the toes, producing lameness and permanent injury. Frequently, pregnant animals abort.

### Many Rural Schools Close In Saskatchewan In Past Twelve Years

REGINA.—Schools have closed in almost 1,000 rural districts in Saskatchewan as a result of the decrease in the province's rural population since 1940.

This was disclosed in the Saskatchewan legislature by the annual report of the education department. The report said enrolments in these districts were so low that schools could not operate successfully and were therefore closed.

### UNUSUAL OPPORTUNITY TO MAKE MONEY IN SPARE OR PART TIME

Large international liquid fertilizer manufacturer requires men for direct selling from factory to farmer. Yes, here is your opportunity to make money! Previous selling experience unnecessary. You can take orders in your own district. Every grain farmer is a potential customer for our product — repeat business year after year. We are offering a proven sales plan which enables men to enjoy steady earnings writing orders full or part time. No investment is required and you will not be asked to buy merchandise. Send \$1.00 for your complete sales kit. This deposit will be refunded on your first order. Act now, send immediately to:

BOX 84, LONDON, ONTARIO

### Funny and Otherwise

"Do you remember that night I kissed you?" asked the young man-about-town.

"Oh, yes," replied the chorus girl.

"And you remember my saying that you would be mine, all mine, for ever and a day?"

"Yes, yes!"

"I was afraid you would."

After giving an army private serving abroad a dressing-down for being late in returning with supplies, the sergeant demanded: "Now, let's hear how it happened, Miller."

"Well, I picked up a chaplain along the road," explained the offender, "and from then on the mules couldn't understand a word I said."

Women's Tears: First successful fluid drive.

Television: A device that permits people who haven't anything to do to watch people who can't do anything.

"Did your grandfather live to a green old age?"

"I should say so! He was swindled three times after he was seventy."

Professor—Why don't you answer me?

Freshman—I did, Professor. I shook my head.

Professor—But you don't expect me to hear it rattle away up here, do you?

### Sask. Crude Oil Output Hits Record

REGINA.—Saskatchewan's crude oil production in 1951 totalled a record 1,249,281 barrels, the resources department reports.

This was an increase of 208,183 barrels over 1950, when the greatest previous yearly production was recorded. In 1949 the province produced 782,188 barrels.

Most of the 1951 output came from the Lloydminster and Lone Rock fields which produce a heavy asphaltic type of oil. Other sources which contributed to last year's total were the Dina, Maldstone and Coleville fields.

At the end of the year there were 101 producing wells in the Saskatchewan side of the Lloydminster field, 77 at Lone Rock, seven at Dina, six at Coleville and three at Maldstone.

### Do You Know That...

The first wheat harvested in Western Canada was produced in 1813.

## Light, fine-textured BUNS

So easy to make with  
new fast DRY Yeast!

Here, at last, is fast acting yeast that keeps — stays full-strength without refrigeration till the moment you use it! No more spoiled yeast — no more slow yeast! Get a month's supply of the new Fleischmann's Fast Rising Dry Yeast!

### FEATHER BUNS

● Combine  $\frac{2}{3}$  c. water, 3 tbs. granulated sugar, 1 tsp. salt and  $\frac{1}{4}$  c. shortening; heat, stirring constantly, until sugar and salt are dissolved and shortening melted; cool to lukewarm. Meanwhile, measure into a large bowl  $\frac{1}{2}$  c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Add cooled sugar-shortening mixture and stir in 1 well-beaten egg and 1 tsp. lemon juice. Sift together

twice 2 c. once-sifted bread flour and  $\frac{1}{4}$  tsp. ground mace. Stir into yeast mixture; beat until smooth. Work in 1 c. once-sifted bread flour to make a very soft dough. Grease top of dough. Cover and set in warm place, free from draught. Let rise until doubled in bulk. Punch down dough and cut out rounded spoonfuls of dough with a tablespoon and drop into greased muffin pans, filling each pan about half-full. Grease tops. Cover and let rise until doubled in bulk. Bake in a hot oven, 425°, about 20 minutes. Yield — 20 medium-sized buns.

# Savants See Better World In 2,000 A.D. Also Hear Man Complaining Still

By HENRY C. NICHOLAS  
(CPC Correspondent)

NEW YORK.—There will not be another world war during this century. The next 50 years will witness an amazing increase in wealth and prosperity, with a continuous rise in the world standard of living. The threat of world overpopulation will disappear with ample space for everyone, thus removing one of the long existing causes for wars and revolutions.

By the year 2000 cures for most of the diseases of man will have been discovered. The average age will be about 100 years. Journeys through space in rocket ships will be an established form of transportation, with regularly scheduled trips to the various planets. A number of man-made moons will be circling around the earth.

These are the startling predictions, not of imaginative writers and science fictionists, but are the sober conclusions of our greatest scientists, including many of our most famous Nobel laureates.

At the meeting of the International Congress of Astronautics in London and the convention of the American Chemical Society in New York, the largest assembly of scientists in history, a selected number of the most famous of these scientists were invited to gaze into the crystal ball and tell what the world will be like after the next 50 years.

Here is what the world will be, say these famous scientists, when it stands at the end of the twentieth century and reviews its momentous last 50 years.

An atomic world war was averted in the 1950's, though by the "narrowest of margins", according to Dr. James Bryant Conant, world-famous chemist and president of Harvard.

The Communist world and its opponents, which then controlled most of the world, became somewhat mellowed by "time and local conditions" and the startling new revelations of the mysteries of the universe.

Atomic energy has been a disappointment, both as a destructive weapon of war and its constructive peacetime development. In the 1970's atomic energy was replaced by solar energy as an inexhaustible source of new power.

With this development, which was fully established by 1985, the world at last realized its age-old dream of lifting most of its labor from the backs of man.

Dr. Adolph Butenandt of Germany and other Nobel laureates from Sweden, Finland, England, France and America, were in agreement with Dr. Conant that solar energy would revolutionize the world through supplying man with an inexhaustible and previously largely untapped source of cheap power.

The amount of such cheap power available to the world in the year 2000 will be beyond comprehension. The amount of sunshine energy, which yearly falls on only a few acres of land, when converted into man-made power, was sufficient to supply enough electricity for a city of a million inhabitants.

In the 1950's, said Arturi I. Virtanen, a Nobel prize winner of Finland, food plants used only one per cent. of solar energy.

Fifty years from now the world will be able to increase its food supply 50 times over. This increased production will come largely from enhancing the efficiency with which plants use sunlight to make sugar

DR. JAMES BRYANT CONANT  
—Central Press Canadian

Fishing will not be the only crop obtained from the sea. There is more wealth in any square mile of the sea than there is in any square mile of land.

With the abundant and almost costless power of solar energy it will be possible to mine the minerals and harvest the green growth that teems in the ocean. Fresh water will be obtained from the ocean and great

deserts that are near the sea, like the Sahara in Africa, will become garden spots.

There was general agreement among the scientists gazing into their crystal balls that space travel will be an established means of transportation well before the year 2000.

Dr. Werner von Braun, who was the chief developer of the V-2 rocket for Hitler and who is now working on guided missiles for the United States, said that most of the problems of space navigation will have been solved during the 1950's.

The first step toward true space navigation were earth moons—man-made satellites high in the earth's atmosphere. Persons stationed on these earth moons continuously circulating around the world, will be able to observe and report any unusual activity that threatens peace on earth.

Supported against the earth's gravitational pull by the centrifugal force of its rapid motion, only moderate power will be needed to launch space ships from these satellites which possess no atmosphere.

While the world will be changed beyond recognition in the year 2000, say these scientists, man will remain much the same strange and unpredictable creature he is today. There will still be many bemoaning the passing of the "good old days".

(By Francis James)

Dear Miss James:

We recently moved into an upper duplex converted from the second story of an old house. Our entrance hall, which is too big to be ignored (8'x12") has no window and is consequently very dark. It leads through an archway into the living room and it is from here that it gets its only light. Is there anything we could do in the way of decoration to make this seem a little more cheerful? Also leading off the hall is a room which was originally, I think, a large closet. It is 6'x8', has a slant ceiling on one side and also no window. I had thought of turning it into a little powder room and wondered if you could give me some idea of how I could make this an attractive unit with the hall—and at the same time turn it into an interesting and cheerful little room?—Mrs. K.R.

Dear Mrs. K.R.:

The dark hall could be immeasurably improved by the use of bright, warm color on the walls. Best choice here, I should think, would be one of the rosy colors—or yellow. Here's one interesting scheme for the hall, walls in wallpaper predominantly rose, with a slim stripe in a slightly paler tone; ceiling in wallpaper with

white background with great bursts of large roses; woodwork, white. Do the powder room in the wallpaper of the hall ceiling and your dressing table skirt in pale blue. Any shelves, cupboards, etc., which you have in here could be painted to match.

If you choose yellow, your scheme could be similar—with hall walls in striped yellow paper, hall ceiling wallpaper with either yellow or white background and bold pattern in brown and bronze. Powder room walls papered to match. Dressing table skirt and stool in lighthearted lime green—with shelves, cupboards, etc., painted to match.

For further, colorful effect place the wallpaper of hall ceiling or powder room walls beneath the glass atop of the dressing table.

## USE CANADIAN WATER

Calais, Me., is one of the few communities in the U.S. that gets its water supply from another country. Since 1906, Calais has received its water from St. Stephen, N.B., just across the Canadian border.

The great influenza epidemic of 1918 killed more persons than both World Wars combined. It brought death to 21,642,000 men, women and children throughout the world.

## On The Side : By E. V. Durling

Among a series of unkind remarks about the characteristics of husbands, a feminine scribe says: "They get close haircuts to hide the gray creeping in about the ears." Isn't it strange considering the time, effort and money women spend on rejuvenating their appearance that they should be inclined to sneer at a man who wants to appear as young as possible? It is not always vanity in a man. Many a fellow has a very good practical reason for wanting to avoid the appearance of age. Women have a variety of means for rejuvenating the appearance of their hair, and nothing is thought of it. But if a man, even one whose profession may demand he maintain a fairly youthful appearance, wears a toupee the ladies make him the subject of derision.

### There Should Be a Law . . .

Why shouldn't there be a law that house numbers must be placed in a prominent position and illuminated at night? Give the messenger boys, delivery men and guests who are making their initial visit a break. Have you ever wandered around a section strange to you trying to spot a house number with no success? And then when you have finally found it have the hostess give you a dirty look for being late to dinner?

### Speaking of Records

Ever hear of triplets being born in different years? I am referring to one set of triplets. It happened in Norfolk, Eng. One triplet was born in 1951, the other two in 1952. The period between the birth of the first of the triplets and the other two was one week. This is said to be the record for elapsed time between the birth of triplets.

### Professional Pride

Which trade requires more training and more intelligence, butcher or barber. In Cleveland a barber sued a customer for calling him a "butcher". The judge in commenting on the case said that it required much more intelligence, and training to be a butcher than it did a barber.

### His First Love

Prince Charles of England is an avid dog enthusiast. He is continually asking his parents to give him a dog. He wants a big dog, Dalmation or a Great Dane. He calls dogs "woofers". First time he saw a Pekingese he screamed with laughter saying to his nurse: "Look at that funny woofers!"

### Cure for Catarrh

Italians rarely have nasal catarrh. This is because their language makes them use the nasal cavities. This is also why so many Italians are good singers. So I note it claimed. Therefore, if you are bothered by nasal catarrh, why not learn to speak Italian? It might also make you a good singer.

## Changing Population Causing Problem To Rural Church

Population problems of the Canadian prairies were surveyed by the Rev. Homer Lane of Saskatoon, Assistant Secretary of the Board of Evangelism and Social Service of the United Church of Canada at the annual meeting of this Board held in the Wesley Buildings, Toronto.

There is a steady drift from country to town, Dr. Lane reported.

"The full import of these trends and changes is coming home to discerning men," he said. Behind and within them lie sweeping social, cultural, economic, and religious changes. They require searching study on our part. Agricultural leaders have found, for example, that over half the agricultural societies on the prairies, once flourishing organizations, are now lying dormant or have ceased to exist. The Church is confronted with a grave situation. The rural Church, long the backbone of both Church and Nation, is languishing, and in some communities practically dead, through lack of people and lack of interest. Ministers are driving long distances to serve scattered people. We must rethink and re-shape our Church's whole strategy and plan of attack if we are to meet the religious needs of the prairies.

Dr. Lane said that: "The urban population of Manitoba has risen 20.02 per cent., and the rural declined by 9.4 per cent. In Alberta the urban gain is 58.5 per cent., and the rural loss is 7.97 per cent. In Saskatchewan the urban gain is 24.9 per cent., and the rural loss 23.2 per cent. Taking the prairies as a single region the urban population is up 33.6 per cent. and the rural down by 14.7 per cent."

★ ★ ★ ★

**PARACHUTE, HELICOPTER SAVE LIFE OF MARITIMES GIRL**—The R.C.A.F. is credited with saving the life of Marie Mazerolle, eight, when she contracted appendicitis in the snowbound village of Point Sapin, N.B. Army doctor Capt. James Gilbert parachuted into the village to treat the girl, then an R.C.A.F. helicopter landed in front of the village church, (above), to take the stricken girl to Chatham, N.B.—Central Press Canadian

At Chatham, the girl was taken from the helicopter and sped to hospital where an emergency operation was performed.

**END OF TRAIL FOR MOST-FOUGHT-AFTER U.S. BANK ROBBER**—Willie "The Actor" Sutton, one of the 10 most wanted criminals in the U.S., is shown in custody of policemen and a detective after his arrest in Brooklyn, N.Y. A long-time fugitive from a Philadelphia prison which he broke out of on Feb. 10, 1947, Sutton was picked up by two detectives who recognized him on the street and positively identified as the leader of three bandits who strolled into a branch of the Manufacturers Trust Company in New York on March 9, 1950, and exited with \$63,942. The most sought-after bank robber in the country, Sutton, whose exploits and disguises have become criminal legend, also has been mentioned by police in many other recent big jobs—including the \$1,500,000 robbery of Brink's, Inc., Boston armored car service, in 1950.—Central Press Canadian.

**PILL MAY CURE DREAD DISEASE**—In this little pill, physicians hope they have a cure for tuberculosis. The pill, one of two types developed at Seaview hospital, New York, will be tested in Canadian hospitals as soon as its action on TB patients is definitely established. At Seaview, patients taking the pill gained weight, showed a reduction in fever and lost most of the symptoms of the disease.—Central Press Canadian.

**FELL SIX FLOORS WITHOUT HARM**—Three-year-old Roberta Renny, is shown being examined in a New York hospital by Dr. Abel Mostofi after she picked herself up and toddled off after falling six stories into thick shrubbery. An x-ray examination at the hospital revealed no serious injury to the child.

**DEFENDS HIS HOME AGAINST RAIDERS**—Howard Prevatte, 30-year-old North Carolina farmer, stands at the door of his three-room cabin holding the rifle with which he fought off an attempt by masked raiders to seize him. When shots from the rifle drove off the raiders, Prevatte took his family to a neighbor's house. With him holding the fort here are James, Jr., Mrs. Prevatte and baby Shirley. Young Bobby looks warlike in front of his dad. Recently ten men, believed to be Ku Klux Klan members, were arrested for hogging a man and a woman in North Carolina.

**Solitary Confinement for Turtle**—VICTORIA, B.C.—Rosie, the pugnacious snapping turtle at the Provincial Museum here, has been sentenced to solitary confinement for life. Rosie was moved into a private tank after she killed a small alligator which shared her former quarters.

Benjamin Franklin introduced the broom into the United States.

**JOHN LEONARD SMALLMAN, 18**, known as Canada's richest teenager, and his bride the former Mary Kathleen Connell Steers, 20, as they emerge from St. Martin's Church in London, Ont., after their recent marriage. John was only 14 when he received a \$2,600,000 bequest under the will of a great-aunt. The couple have known each other all their lives. Mary Kathleen attended John's birthday parties since they were small children. Although the bride is a Roman Catholic and the groom a Protestant the ceremony was held in the church since London diocese is one of the four in Canada where mixed marriages in a Roman Catholic Church are permitted by the Bishop.

**MAY BECOME FEDERAL DEPUTY MINISTER**—Pat Conroy, shown with his wife and daughter, may be recalled from Washington to become federal deputy minister of labor under Hon. Milton F. Gregg. At present he is labor attaché in Washington where he went after disagreement with the Canadian Congress of Labor of which he had been secretary-treasurer.—Central Press Canadian.

**CHARGED WITH MURDERING ELEVEN**—Marie Besnard, 56-year-old widow awaiting trial in the arsenic deaths of 11 acquaintances and members of her family, is pictured after a preliminary trial in Poitiers, France, in which she was found guilty of having put a false signature to a warrant. The widow, described by her townspeople as kind-hearted and pious, has been declared sane and if found guilty in the 11 deaths faces the guillotine. At the preliminary trial she was sentenced to two years in prison for the false signature.—Central Press Canadian.

Conducted by Lloyd "Ace" Percival

## Setting Up A Hockey Forward Line

The players on a line should be mentally and physically compatible. In other words, the coach should study the players carefully both in regard to their attitude and physical qualifications and try to form his groups so that the same types are playing together. If this is not done, you will often find a defence-minded team mates which will very likely interfere with the cohesion and co-ordination of the line.

There seems to be no reason why three players who are compatible should not be placed on one line regardless of whether or not they all shoot from the same side. It has been proved that a right-handed player, for example, loses nothing of his effectiveness when playing on left wing.

If a coach wants a certain line or group to be an offensive threat, he must think offensively when making up a line. It is very difficult to get an effective offensive unit from a group of three players who think defensively.

The habit of placing one defensive man on a line with two strong offensive players in order to keep the checking emphasis in line may prevent scores by the opposition, but at the same time it frequently weakens the offensive strength of the same line.

It seems by far the best thing to put your offensive forwards together no matter how weak their checking and the same thing holds true with your defensive men no matter how weak their offensive skill. Then, try to improve either the defensive or the offensive play of the group concerned until this phase of their game is strong enough to make the line effective. After all, an offensive unit can't forget about defense altogether.

Actually the problem gets back to the basic point, do you spoil the offensive strength by bringing into consideration the defensive picture at the same time? The answer seems to be that the players must be taught a clear-cut definition of when the offensive obligation shifts to a defensive one.

To make an offensive work to peak efficiency, the players must be able to concentrate on it without a haunting feeling that they are neglecting their defensive play. Long hours of defensive instruction may ruin the effectiveness of the offensive pattern which a forward line may have developed. In any game, the offence that works best is the one that is organized and carried out with fire and abandon. And don't forget that the opposing team can't score goals if your team has possession of the puck.

Probably the best example of the ideal line set-up is the Lindsay, Abel, Howe combination of the Detroit Red Wings of the N.H.L. They are all offense minded, can check, set up plays, and score goals with the best in the league, yet each one has an outstanding ability of his own which balances their offensive and defensive power. Although each man on this line is a good checker, particularly Lindsay, they do most of their checking in the opposing team's end of the rink. In other words they forecheck, really hemming the opposing team in their own end. Then too, they're "puck hawks", pouncing on any loose puck like a shot when the opportunity arises. It's reasonably safe in saying that most of the time when they're on the ice, this line usually have possession of the puck with but one thought in mind, and that is—to score goals!

So if you, as a player, find yourself out of place with a couple of "goal hawks" take it up with the coach and I'm sure he will only be too glad to straighten things out. Remember, you've got to enjoy playing with your linemates.

### Ask "Why"?

Whenever you make a fake or manoeuvre that fails try to figure out why it failed. Figure out what your opponent did that stopped you, decide if you moved too soon or too late and so on. If you get this habit of studying why your tricks fail you will soon acquire enough knowledge and information about your own play that will help you perform them better. Check to see what tricks work most effectively. Then put them to use when they will really count. Never use your best tricks too often—save them for important moments.

### Keep Fit

Perfect physical condition is the foundation on which all success in sport must be built. It is also the foundation of healthy, worthwhile and happy living. Perhaps the most

important factor regarding how you feel each day is the general regularity of your day to day living habits. If your every day living habits such as sleeping, eating, elimination, exercise and so on are performed on a regular schedule pretty close to the same time each day, your body gets into a smooth working groove—it learns to know what is expected of it and thus acts more efficiently on a regular, steady schedule.

However, if your daily habit pattern is not conducted on a regular schedule your body never has a chance to get in that groove, and as a result you can't depend on just how you are going to feel. Thus, if you want to be assured that you are giving yourself every chance to feel at peak condition regularly, make sure you regulate your daily living habits.

## Curling Playdowns Bring Canada Closer Together

The first half of this century has seen many changes in the game of curling in Canada!

There are, however, some things about it that have not changed. It is still not divided into amateur and professional. There is no one group who makes a living by teaching or playing the game and there is still no group of officials whose duty would be to watch the players and inflict punishment for infraction of rules.

There are of course regulations, many of them, but there are no penalties if they are not observed, for the spirit of curlers is to obey the rules rather than to break them.

The changes that have occurred are good ones. There has been created a close association between east and west, brought about largely by the Macdonald Brier competition and the formation of the Dominion Curling Association.

There has been a great increase in the number of clubs and the adoption of artificial ice plants by those who suffered from climatic changes has provided much more and much better curling. The game itself has become a game for men and women, boys and girls, instead of an old man's game.

### RED CROSS WORK

Through the Red Cross some 8,000 pupils received swimming and water safety instruction at 62 places in Saskatchewan. Over 28,000 have enrolled in classes since 1946. Drownings have continued to be below average.

Think Right—Eat Right—Live Right

## Kitchen Meditations

### THE WIND IN THEIR FACE

It is easy to travel life's road every day With the wind in your back all along the way.

It gives you a lift when the going is hard; It puts wings to your feet, and does not retard.

It is easy to prosper with the wind helping you,

And you wonder why others are not gaining too;

Are not sailing through life with abandon and grace.

Yet you never once think—They've the wind in their face!

### \$20 BILL SPLIT, PASSED BY SWINDLER

PORT ALBERNI, B.C.—Someone here made a \$19 profit on a \$20 bill, investment when he split a \$20 bill, glued each half to a section of a split one dollar bill, and passed the result of his art on two local stores.

So far R.C.M.P. have not been able to catch up with the passer of the bogus notes. Penalty may be a seven-year penitentiary term if he is brought to justice.

### Weekly Tip

#### STAINED HANDS

Most stains can be removed from the hands by rubbing vigorously with a slice of raw potato.

## World Happenings Briefly Told

Narvik in Northern Norway, where the sun is absent for two of the winter months, has built a "solarium" for school children, featuring ultra-violet radiant walls and ceilings.

Britain will make a gift of military equipment worth £3,250,000 to Yugoslavia during the coming financial year, Foreign Under Secretary H. A. Nutting told the House of Commons.

The trade department estimates that on a per-capita basis Canada in the 12 months ended September last achieved \$536 worth of trade for every man, woman and child in the country.

Mrs. V. A. Dryvnsyde, founder of the Athlone private school for boys in Vancouver, has been awarded third prize of £300 in the Australian government-sponsored literary competition.

The Canadian consulate in Frankfurt has moved to Bonn, the West German capital, where it has reopened as consular section of the Canadian embassy. The consul is W. S. Durdin, a former newspaper man.

Australian airmen and engineers have moved into the lonely Cocos islands, beauty spot in the middle of the Indian ocean, to make a strategic new air base and stopping place for aircraft flying between Britain and Australia.

### THE SINGING SPARROW

(Mrs. Fred Bilsbury, Grenfell, in The Blue Jay)

Now are all you young folks ready to hear another little story of another of our pets? First, I must tell you that our lovely big Peter is still with us. We have seen him many times among the cattle, of all places! He still seems to have a strong memory of having been raised around the farm. He never runs far. When called he sits quite still.

So now I will tell you about the House Sparrow who could sing. One day about four years ago I was working in the garden quite close to the house. I saw an old mother cat come around the corner with something in its mouth. The "something"

was kicking and fluttering so I at once came to see what she had. I told her to put it down, which she did. I picked up a baby sparrow, almost feathered, with a part of one wing missing. The cat had not injured it in any way, so I put it in a little box and fed it bread and milk with a pair of tweezers.

We named him "Dickie". Later we made a wooden cage for him and hung it in a south window. We taught Dickie to feed himself from an egg cup, in which we put cracked oats. The children, of course, played with him and he learned many things. His wing never grew the needed part to enable him to fly—when he did try to take off, he fell flat.

I never knew a more clever bird. He knew in a minute if a member of the family was in a hurry. He became excited and tried to fly after them as they hurried into another room. So we usually scooped him up and put him in a tin of chop in the kitchen window. He loved a saucer of water for a bath. One day he fell into a pail of warm wash water. What a sight!

Here are some funny things Dickie learned. One of the children would put him on their dad's shoulder; then the other would pretend to slap Dad. Dickie at once would stand up, and with wings down and wide-open beak would fight off the offender. Then he would snuggle close to Dad's neck. This they would do several times only to be driven away by Dickie.

One evening I heard him twittering, so I said, "Sing Dickie" and turned the radio low. Again I repeated "Sing Dickie". Well he tried and tried in not many days he could sing as well as any canary. He never sang unless told to, but would twitter in the usual sparrow manner. Aletha sometimes pretended to cry and Dickie would be nearly frantic. He would hop along the table in front of her, array his wings, then snuggle against her face. At times he would even peck her fingers furiously. When she stopped he took no further notice of her.

Now we often think of Dickie and his many funny ways. But best of all was his singing.

## Fashions

### Half-Size Fashion

4564

14½-24½

by Anne Adams

YOU WILL LOOK TALLER, and slimmer! This style is cut to fit the figure with shorter waistline, generous bust and hips. It's a perfectly proportioned half-size pattern. You'll love the sweetheart neckline, step-in closing.

Pattern 4564: Half sizes 14½, 16½, 18½, 20½, 22½, 24½. Size 16½ takes 3½ yards 39-inch. Embroidery transfer included.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,  
Winnipeg Newspaper Union,  
60 Front Street W., Toronto.

## Helpful Hints

When bath towels begin to wear out, use the good parts for children's bibs. They are easily washed out after each meal and need not be ironed.

A little baking soda sprinkled in an ash tray extinguishes burning tobacco and makes the tray easier to clean.

Take a large sponge with large pores, wet it, and place two or three hyacinth bulbs in the pores near the center. Sprinkle grass or mustard seed around the balance of the sponge. Hang the sponge in a sunny window and keep it damp. You will have a pretty flower ball entirely covering the sponge.

### ANSWERS TO QUICK QUIZ

ANSWERS: 5. In 1944 Ottawa's tax revenue was \$2,765,000,000; this year it will be about \$4,300,000,000. 3. The muskrat, over 4 million pelts in 1949. 1. Slightly smaller; 363,282 sq. miles compared to 359,279. 4. Almost five million, of which more than four million are children. 2. By pipeline from Edmonton to Lake Superior, from there by ship.

(Material supplied by the Editors of Quick Canadian Facts, the handbook of facts about Canada.)

—Central Press Canadian.  
**PAPAL OFFICIAL** — In Vatican City, Prince Sigismondo Chigi Albani Della Revere has been named by Pope Pius as perpetual marshal of the Holy Roman Church and custodian of the conclave. One of his new duties will be the ensuring of complete secrecy when the College of Cardinals meets to elect a new Pope.

## Man Bluffed Way Across Atlantic And Back —ON LUXURY LINER

LE HAVRE, France. — Lucien Curty, 53, bluffed his way through a free trans-Atlantic round trip to New York by wearing a steward's jacket when he got on and off a luxury liner, it was disclosed in court.

Curty boarded the Ile de France here Jan. 4. Once aboard, he hid the steward's jacket.

He spent the night on a deck chair on the promenade deck. When asked whether it was not too chilly, he replied he had asthma and his cabin was "too stuffy". He solved the food problem by buying sandwiches in the bar.

When the liner arrived in New York, Curty put on his white jacket and passed United States immigration officials.

He started looking for a job but no one wanted to hire him. With his savings gone, Curty decided he would have to return to France. He waited for the Ile de France, put on the white jacket, and got aboard again. Curty again drew out his steward's coat but this time French police detained him as he lingered on the gangway at Le Havre.

He was sentenced to one month in jail.

### SENSITIVE BIRDS

Canaries and other house-birds are more susceptible to drafts than human beings.

Last year the Manitoba text book bureau distributed 1,000,000 books to teachers, pupils and schools.

## ODDITIES In The News

A cat walked unharmed out of the smoking ruins of a garage apartment at Detroit as firemen waited for debris to cool so they could poke through the ashes.

An old dog belonging to a Peterborough resident of nearby Burleigh Falls was spry enough to kill a deer. The dog is 11 years old, blind in one eye and crippled in one leg. Its owner, however, was fined for letting it run at large in a locality usually inhabited by deer.

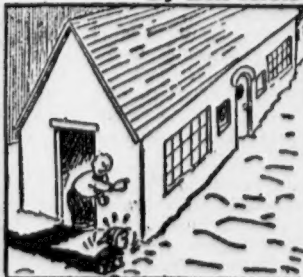

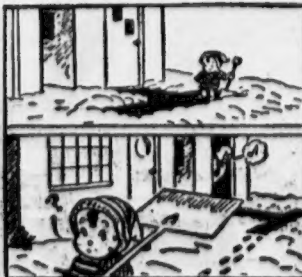

Two Japanese business men, Hide-mare Endo and Toshiya Tsuchiya, left London airport full of a new dietary discovery. "We have forgotten how to eat rice," they chorused. "Soon after we arrived we discovered fish and chips, and they are wonderful."

A hunting dog, owned by Jim Tolbert, Gainesville, Ga., flushed a covey of quail while crossing the Southern Railway tracks. Randy, a liver and white pointer, froze on point, true to his training, and died under the wheels of a streamliner southbound from Washington.

A draft board clerk, Mary Bell, of Milwaukie, Ore., reported an 18-year-old youth registered and then handed her a \$1 bill. She explained there was no charge. "You mean I don't have to pay?" the youth asked. "Gosh; you sure have to pay for everything else."

## GARDEN NOTES

For Best Results  
Plant Grass Seed  
In Cool Weather

### Early With Grass

Grass Seed can hardly be sown too early in the spring. In fact some people sow it last thing just before the snow in the fall. In any case it should be planted while the weather is still cool.

High quality grass seed mixtures as put up by reputable Canadian seed houses are much the best. These may cost more than the other kinds because they are the only ones that contain the right proportions of various expensive grasses for permanent results.

It is much easier to get the ground fine and level in new lawns and in repairing old ones before the seed is sown. Seed should be broadcast two ways, once across and once lengthwise, for even results, and of course, when there is little or no wind. For the first cutting a very sharp mower is advised, otherwise the tender grass may be pulled right out by the roots.

Grass like other plants will benefit from good rich soil and an annual application of well rotted manure or a chemical fertilizer rich in nitrogen. An occasional application of one meal will add to depth of color. Well fed grass will crowd out a lot of weeds. Most of the others can be eliminated by the new chemical killers.

### Sweet Peas

This is another thing to go in early. One should follow planting directions closely; that is, sow in the richest possible soil and in a shallow trench.

Later on something to climb on must be provided. Best materials are some branches, strings or netting. Normally sweet peas will grow

about three to four feet tall, but in Western Canada and some other areas where this plant really flourishes much more than this will be necessary. When bloom starts these should be removed daily in order to encourage long stems and continuous blossoming.

### Something New!

Plant breeding is a work that is never finished. The people who follow that profession are continually producing and searching for new and improved plants. They are giving us better colors in flowers, new hardness in both flowers and vegetables, brand, new types more suited to our special climate. In exploring this wide-open field, the beginner is advised to keep in mind local conditions and requirements. Flowers, vegetables and fruits that may give wonderful results in the Southern States or in England may be far too tender for any part of Canada. Some things that thrive on Vancouver Island are not rugged enough for the Red River Valley.

## Patterns

### Needlework News

7126

by Alice Brooks

SOMETHING NEW! Embroider this needlepointing in the usual way, then add ready-made eyelet ruffling for the girl's skirt. Effective! Easy! Lovely in frame or lined as a wall-hanging.

Pattern 7126: transfer of picture motif 15x19 inches.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,  
Winnipeg Newspaper Union,  
60 Front Street W., Toronto.  
Be sure to write plainly your Name, Address and Pattern Number.

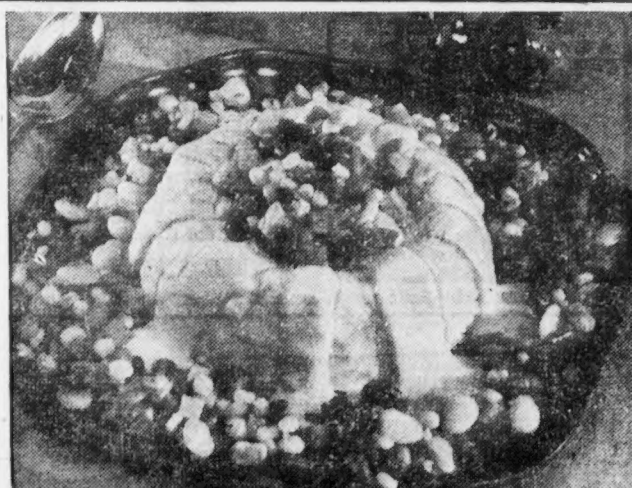

NEW! The 1952 edition of our Alice Brooks Needlecraft Book! Brimful of new ideas, it's only Twenty-five cents. NINETY-ONE illustrations of patterns of your favorite needlecraft designs, plus SIX easy-to-do patterns printed right in the book.

### SMILE OF THE WEEK

An Indian petitioned the judge to give him a shorter name. "What is it now?" asked the judge. "Chief Screeching-Train-Whistle," said the Indian. "And what do you want to shorten it to?" pursued the judge. The Indian folded his arms majestically and grunted, "Toots".

Only 252 warships were involved in the battle of Jutland in 1916.

## : Selected Recipes :

Macaroni ring with cheese sauce combined with mixed vegetables makes a hearty lenten meal for a hungry family. Simple to prepare, it's one of those "stick-to-the-ribs" meals you'll appreciate.

### Macaroni Ring—Cheese Sauce

One and one-half tsp. butter, 1½ tsp. flour, ¼ tsp. salt, 1½ cups milk, hot buttered vegetables, 2 cups cooked elbow macaroni, ½ lb. Canadian cheese, ½ tsp. pepper, 2 eggs, 1/3 cup milk.

Prepare cream sauce with butter, flour, seasonings and 1½ cups milk. Add to the slightly beaten eggs. Add well-drained macaroni.

Pour into a well-greased 6½-inch mold. Bake in moderate oven, 350 degrees F. for 40 minutes or until firm.

Melt the cheese in the top of a double boiler. Add the one-third cup of milk gradually, stirring constantly until the sauce is smooth. Unmold the macaroni ring on a chop plate and pour the hot cheese over it. Surround the ring and fill the centre with hot buttered vegetables.

## OUR COMPLETE SHORT STORY—

## Family Inspiration

By JANET DORAN

TOM never actually said he was ashamed of Lorna's Aunt Sara and Uncle Ike, but the years of their marriage were milestone with his jibes. She re-read Aunt Sara's scrawled letter. The third cup of black coffee reminded Lorna of Tom's crack about coffee with cream and sugar making her look as shapeless as her Aunt Sara.

Now her uncle and aunt were coming to visit them—their first trip to the big city, though Tom drove her out to the farm every summer for a few brief calls, driving back alone, if she wanted to stay. How to keep from letting these dear people know how Tom felt? As her foster parents, they adored Tom, Lorna knew. But Tom would be impatient with them. He detested sentiment. He was ambitious and sure of the course he was taking to the top of his career. Uncle Ike and Aunt Sara were at the twilight of their lives. But sometimes Tom wasn't so sure.

"You manage to grub \$1,200 the year out of that rock-pocked farm," he told her uncle once, "and you have eggs, cream, butter and fruits and vegetables. Often we can't afford them on my ten thousand a year."

"Nothing's wasted, farming, Tom," her uncle twinkled. "Nothing goes for show and front here. We have everything we want and we sell what's left to make up the stuff we can't produce. It's a good way of life."

"Everything city folks have has to be shipped, stored, and rehandled," Aunt Sara added, "so it costs more to live your way." The explanation irked Tom. He resented their frugal abundance.

## SLEEP .. and awake Refreshed

If you don't sleep well—if nights are interrupted by restlessness—look to your kidneys. If your kidneys are out of order and failing to cleanse the blood of poisons and excess acids—your rest is likely suffering too. Then is the time to use Dodd's Kidney Pills. Dodd's help your kidneys get rid of trouble-making poisons and acids—help restore them to normal action. See how much better you rest at night—how much brighter you feel in the morning. Get and use Dodd's Kidney Pills today. 145

## Dodd's Kidney Pills

## RID YOURSELF OF Cigarette Addiction

TOBACCO ELIMINATOR rapidly expels nicotine from the system and thus removes the craving for tobacco in any form. For free booklet and copy of testimonials, write

Helps build stamina—helps maintain resistance in youngsters and adults. Scott's is a high energy TONIC—with natural A & D Vitamins in natural oil and added minerals. Easy to take, Scott's is highly recommended. Buy today at your favourite store.

MORE than just a tonic

## SCOTT'S EMULSION HIGH ENERGY TONIC

## I Was Nearly Crazy With Fiery Itch—

Until I discovered Dr. D. D. Dennis' amazing fast relief—D. D. D. Prescription. World popular, this pure, cooling, liquid medication speeds peace and comfort from cruel itching caused by eczema, dandruff, rashes, athlete's foot and other itchy troubles. Trial bottle, 43¢. First application checks even the most intense itch or money back. Ask druggist for D. D. D. Prescription (ordinary or extra strength).

## WESTERN BRIEFS

## Quit Shaving

VERNON, B.C. — Officials in this fruit-growing centre called on citizens to quit shaving starting April 1 because a diamond jubilee celebration scheduled to start then "wouldn't be worth the name without beards".

## Wild Geese at Taber

TABER, Alta. — Earl N. Harding reports sighting three wild geese circling over the Taber factory reservoir in search of open water. Mr. Harding said it is the earliest date that geese have been seen in this district in many years.

## Family Custom

WEYBURN, Sask. — There's always a Kempton in the volunteer fire brigade here. When Ted Kempton retired recently after 33 years' service, his son Jack was immediately sworn in as a fireman.

## Polish Consul at Winnipeg

WINNIPEG. — Michael Krycun, 40, second secretary at the Polish legation in Ottawa for the past four months, has assumed his new post as consul for western Canada with headquarters at the Polish consulate in Winnipeg.

## Baby Sitter Fast Asleep

CALGARY. — Police spotted a two-year-old girl on the streets at 2 a.m. They located the infant's home nearby, where they found the baby-sitter was fast asleep. While the baby-sitter was summarily reprimanded, the child was returned to her crib.

## Curling Badges Popular

WINNIPEG. — Badges, once a novelty in western Canada, are gaining in popularity among the curling clubs in the west. "Curlers returning from Dominion play-downs in Toronto started the badge business in the West. Winnipeg picked up the fad and it didn't take Saskatchewan long to follow it.

## Marguerite Higgins Compares Blue Bonnet — Finds Good News!

Here's a timely tip from Marguerite Higgins. Compare BLUE BONNET Margarine with any spread at any price. Like the noted war correspondent, you'll love the delicate, sunny-sweet flavor of Canada's fine-quality all vegetable margarine. You'll appreciate BLUE BONNET's nutrition. And you'll welcome its real economy. So buy BLUE BONNET and get "all 3" — Flavor! Nutrition! Economy! Use it in cooking, on vegetables, as a delicious spread. BLUE BONNET Margarine is sold in two types — regular economy package with color wafer, and also in the famous YELLOW QUIK bag for fastest, easiest color.

BT-38

## YOUR RED CROSS WHAT IS IT DOING?

INTENTLY watching the director of the rhythm band at the Junior Red Cross Crippled Children's Hospital, Regina, is drummer "Gordie", who in 1947 was admitted to the Hospital at the age of six. Known as "Smiler" he is a most cheerful person in spite of suffering from Rheumatoid Arthritis.

"Gordie" is in grade 5 at the hospital's fine school and attends classes regularly each day with the other boys and girls, receives Physio Therapy treatments daily and all the care that modern medical help can give to this condition.

There are many ways in which your Red Cross does the things you would want to do. Some of the services you render by your contribution are Blood and Blood Plasma Service, which starts this year, will provide any person in Saskatchewan who needs whole blood or plasma transfusions free of charge and without obligation. This is a nation wide project, the largest of its kind ever undertaken by a voluntary organization. Equipment for the laboratory in the University Hospital and the collection depots in Regina and Saskatoon will cost about \$140,000. The annual operating expense each year will be approximately \$200,000. This service starts this year!

To destitute children overseas were sent 29,823 articles of clothing made by volunteer women workers in Saskatchewan during 1951. The total cost of materials for these garments exceeded \$18,000. In addition some 1,775 other articles were made and distributed to needy persons in the Province. The volunteer workers used Red Cross work rooms in this service, as well as doing much of the work in their own homes.

When disaster strikes, your Red Cross is ever ready to serve. Fires and other disasters caused 140 families, involving 404 children and adults, to lose their homes and belongings during the past year. These families promptly received bedding and clothing. Altogether 4,155 pieces of clothing and 2,177 articles of bedding were distributed the fastest possible way to these unfortunate people.

In Saskatchewan the Red Cross operates the only Mother's Milk Bank in Canada. New born in-

fants who require mother's milk, and whose own mothers cannot supply it, benefit by this service. In 1951, 67,073 ounces of milk were collected, pasteurized and kept refrigerated for immediate use in hospitals in Saskatoon, Regina, Moose Jaw and Prince Albert. When requested shipments are made to other hospitals from these main banks. Some 428 babies received this life saving milk. There is no charge, of course.

Hundreds of people lean on the Red Cross! If you want to borrow a crutch apply to your nearest Red Cross Branch. Last year 840 items, such as wheel chairs, crutches, hospital beds, and other such sick room supplies were loaned free to 755 sick and convalescing persons. There are 18 loaning centres strategically located throughout the province. The Sick Room Loan Service has been a busy one.

Other services in operating are Outpost Hospitals, Nursing Stations, Veterans Services, Swimming and Water Safety, and other instructional projects as well as Highway First Aid Posts.

For six years, despite rising costs, your Red Cross has continued to expand its services without increasing its financial appeal. This year the provincial objective has had to be raised from \$250,000 to \$300,000 an amount barely sufficient to compensate for increased cost of operation. This amount is the absolute operating minimum for your Red Cross to maintain its WORK OF MERCY.

## More Comfort Wearing FALSE TEETH

Here is a pleasant way to overcome loose plate discomfort. FASTEETH, an improved powder, sprinkled on upper and lower plates holds them firmer so that they feel more comfortable. No gummy, gooey, pasty taste or feeling. It's alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get FASTEETH today at any drug store.

## MAGIC makes baking fine-textured, delicious!

## CINNAMON SANDWICH BISCUITS

Mix and sift once, then sift into a bowl, 2 c. once-sifted pastry flour (or 1½ c. once-sifted hard-wheat flour), 3 tps. Magic Baking Powder, ½ tsp. salt and ¼ c. fine granulated sugar. Cut in finely 4 tbs. chilled shortening. Combine 1 well-beaten egg, ½ c. milk and ½ tsp. vanilla. Make a well in dry ingredients and add liquids; mix lightly with a fork, adding milk if necessary, to make a soft dough. Knead for 10 seconds on lightly-floured board and roll out to ½" thickness; shape with floured 1½" cutter. Cream together 1½ tbs. soft butter or margarine, ¼ c. lightly-packed brown sugar, ½ tsp. grated orange rind and ½ tsp. ground cinnamon. Using only about half of the creamed mixture, place a small spoonful of the mixture on half of the cut-out rounds of dough; top with remaining rounds of dough and press around edges to seal. Spread biscuits with remaining creamed mixture and arrange, slightly apart, on greased cookie sheet. Bake in hot oven, 450°, about 12 minutes. Serve warm. Yield—16 biscuits.

## THE TILLERS

—By Les Carroll

## Level Land

Visiting Lacombe and Canadian Union College for the past weekend were: Mr. and Mrs. Marvin Dick, Mr. Richard Huether, Mr. and Mrs. Earl Chandler, Jr., and Mr. and Mrs. Jacob Gimbel and Glenda.

Mr. and Mrs. Alvin Littman and Mrs. V. Littman of Leduc were visiting Mr. and Mrs. Glen Triebwasser and other friends and relatives in this district.

Ammerylis Gramms, Geraldine Roth, Marjorie Leiske, Howard Gimbel, Don Huether, all of Canadian Union College were home on March 20 to play in the Lions' Band Concert.

Mr. and Mrs. Clarence Suelzle in South Dakota, later North Dakota and in 1908 he settled in the Beiseker district. In 1936 he moved to Calgary where he was employed with Standard Gravel until his death.

**FREDERICK C. BRAUNBERGER**  
An old timer of the Level Land district passed away March 21 in his Calgary home.

Frederick C. Braunberger was born in Russia March 16, 1887. As a small boy he came to America with his parents, settled first

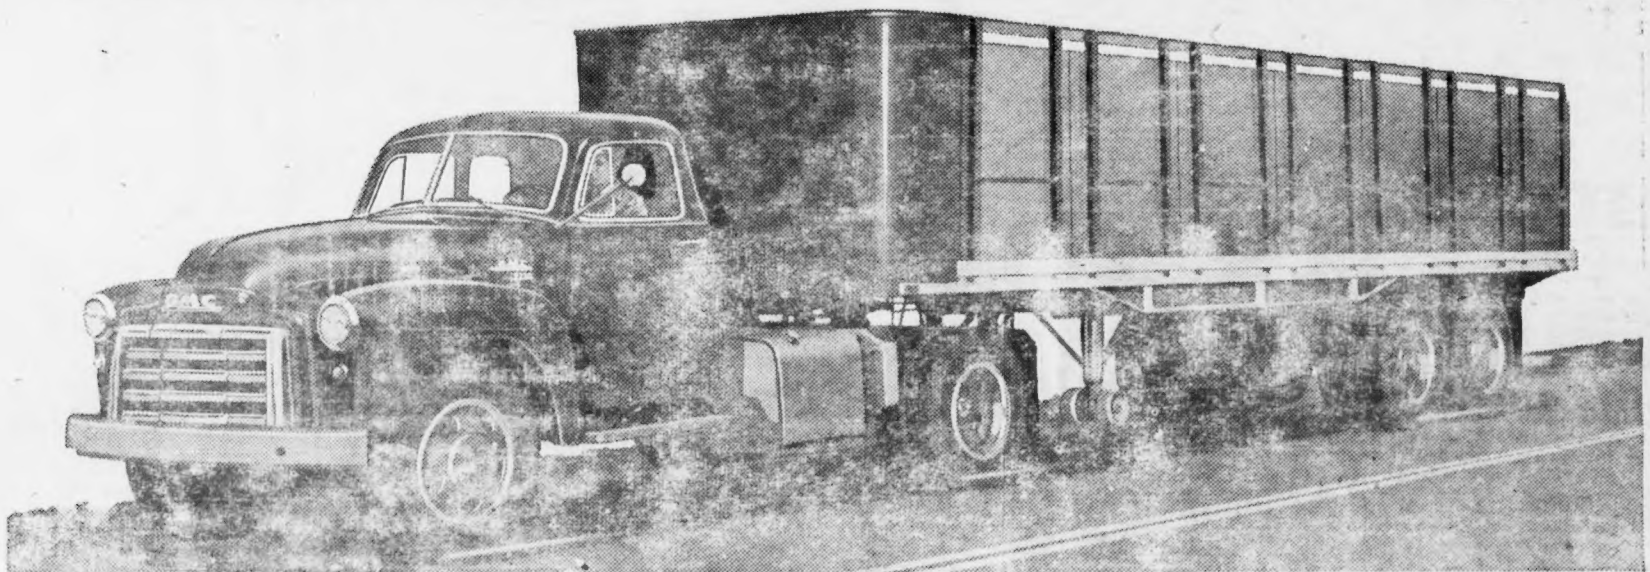

in South Dakota, later North Dakota and in 1908 he settled in the Beiseker district. In 1936 he moved to Calgary where he was employed with Standard Gravel until his death.

He leaves to mourn, his wife, Rosie; two sons, Lloyd and Clarence of Calgary; two daughters, Mrs. Henry Stern of Beiseker and Mrs. Frank Lees of Calgary; five sisters, Mrs. August Hepper

of Chilliwack, B.C., Mrs. Gustav Keson of Harvey, North Dakota, Mrs. Rudolph Gimbel of Calgary, Mrs. David Tetz of Beiseker and Mrs. Jacob Wagner of Salem, Oregon; nine grandchildren.

Services took place from Jacques Funeral Home on Tuesday at 2:45 p.m. with Pastor A. Blair officiating. Burial was in Queen's Park cemetery.
